DC-1338i
The intelligent partner

Pictures of happiness.

AGFAPHOTO

DC-1338i

10.0 MP · 3.0" LCD · 3X Optical zoom · Face tracking · Photo stabilizer · Video with sound · Li-Ion battery · 1600 ISO

Technologically superior

▶ **ASM** – allows to set aperture and shutter speed manually.

▶ **Picture stabiliser** – reduces risk of blurred images and automatically removes any normal shaking.

▶ **ISO 1600** – permits picture-taking with a high sensitivity of up to ISO 1600.

▶ **AF lamp** – serves to determine the distance in poor lighting conditions – so that the subject can be captured sharply.

▶ **Histogram display** – shows the brightness distribution in a view.

▶ **SDHC memory card slot** – supports cards of the new standard which offer up to 4 GB of extra capacity.

For pictures that inspire

Simply click!

For photos that fulfil high demands. The new DC-1338i is your perfect partner for all photographic challenges and the occasional quick snapshot. The slimline, stylish lightweight made from lacquered matt metal lies well in the hand and is easy to use.

Optimal for every subject

The DC-1338i is excellently equipped for every photo session: with a 10-mega-pixel CCD sensor, 3x optical and 4x digital zoom, 3-inch TFT colour display with 230,000 pixels and 21 dedicated scene modes. Each setting can be individually selected or configured automatically with the face tracking function for up to three faces per picture. One thing is for sure: with the DC-1338i you have the right tool for the perfect picture.

And there's even more

Whether you want to photograph people, landscapes or moving objects – the DC-1338i is up for the challenge. With the preconfigured scene modes every moment can be captured easily. Simply put: The DC-1338i offers great perfor-mance at a sensational price.
