**NOTE!** Under this mode, all pictures and video clips stored in the memory will be deleted.

## 4 Installing your Software onto a Computer

### ● Install the software

**IMPORTANT!** - Make sure you install all the software from the CD supplied before you connect your camera to a computer and transfer pictures from your camera to the computer.

**IMPORTANT!** - If the computer request you to install the Windows operating system during the software installation, place the windows CD into the computer CD-ROM drive. The computer will install the necessary files from the CD automatically. When the Windows software appears to have finished the operation close the Windows screen. Remove the Windows CD and store safely.

1. Before you begin, close all other software applications open on your computer.
2. Insert the CD supplied into the computer CD-ROM Drive.
3. The CD User Interface Screen will automatically launch.
4. With the mouse, click on each software interface button in turn following the on screen prompts.

**NOTE!** When prompted to do so, register your name and the other details requested for further on line support. You must be connected to your internet service provider to register on line electronically.

#### **NOTE:**

If the setup screen doesn't appear after loading the CD, then you can manually start it by double-clicking the "My Computer" Icon on your desktop, then double-clicking the icon for the CD-ROM drive. When the CD-ROM window opens, double-click the "INSTALL-E.EXE" icon.

### **For Window® OS users**

If the DirectX version in your computer is not 8.1 or higher, the computer will automatically install DirectX 8.1.

#### **How to Uninstall Digital Camera Explorer:**

1. Go to Start ->Setting -> Control Panel->Add / Remove programs.
2. Locate "Digital Camera Explorer".
3. Press Remove button to delete.

### ● Software included with your camera

The **SPYPEN IUNO** software CD contains the following software;

#### **Digital Camera Explorer Picture Transfer Software**

My Camera software enable Pictures and Video files to be transferred to the computer from the camera.

#### **PhotoStudio® 4.0 Picture Editing Software**

PhotoStudio® 4.0 is a full-featured, easy-to-use digital image-editing program that provides a complete set of photo editing and retouching tools, plus a wide selection of special effects and enhancements. Its powerful features include a wide variety of input and output options, layers, multiple undo and redo functions, image management tools, editable text, multiple file format support and a lot more.

1. Select the "PhotoStudio® 4.0" icon from the "ArcSoft Software Suite" program group on the Windows® Start Menu.

You can now start to download your stored images from your **SPYPEN IUNO** by the following steps:

2. Go to "File" and select "Select Source". Select "WWL 102" as source.

3. Go to "File" and select "Acquire". The capture interface will show up.  
To capture image(s), select the image(s) stored in our camera and click "Transfer".

4. For further help on how to use PhotoStudio® 4.0, go to "Help" to access the Help Topics.  
Visit <http://www.arcsoft.com> for all your FAQ's, tips and technical support.

#### ● **Computer system requirements**

For acceptable picture transfer and editing, we recommend the following minimum requirements;

- Compatible with Microsoft® Windows® 98SE, Me, 2000 or XP
- Pentium® II 333MHz or equivalent processor
- 64MB RAM (128MB recommended)
- USB Port
- 200MB free disk space
- Color monitor with high color (16-bit) graphic capability or higher
- CD-ROM drive
- Standard mouse and keyboard
- Stereo speakers

## 8 Appendix

### ● Technical Specifications

- Memory: 8MB NAND FLASH
- Still Image Resolution: • VGA Resolution only - 640 x 480 pixel
- Storable Images : Approximate 98 images (Fine compression rate)  
Approximate 108 images (Normal compression rate)
- Video Clip:
  - Unlimited when connected to the computer via video capture software
  - Limited when using the internal memory:  
Approximate 17 sec in High resolution 640 x 480 pixel.  
Approximate 26 sec in Low resolution 320 x 240 pixel.
- File Format:
  - Still Image - Compression in JPEG format after download to PC via USB (depend on application used)
  - Video Clip - AVI format
- External Connector: USB
- Auto Power Off: After 30 seconds inactivity
- Power Supply:
  - **SPYPEN IUNO**: USB Port, rechargeable battery (non-replaceable) 10 to 12 hours is needed to fully charge the battery at the first time. From then on, only 1 to 2 hours is needed. The battery can be recharge for about 500 times. Users are not recommend to remove the rechargeable battery. Please contact your customer support for service.
- Operating System:
  - For Windows® Users: Microsoft® Windows® 98SE, Me, 2000 or XP

### ● Tips, Your Safety & Maintenance

Your Camera should only be operated within the following environmental conditions;

- 41 - 104° Fahrenheit; 5 - 40° Celsius
- 20% - 85% relative humidity, non condensing

Battery life or image quality may be affected outside these conditions

#### Camera Cautions

- NEVER immerse any part of the Camera or its accessories into any fluid or liquid.
- ALWAYS disconnect the Camera from your PC before cleaning it.
- ALWAYS remove dust or stains with a soft cloth dampened with water or neutral detergent.
- NEVER place hot items on the surface of the Camera.
- NEVER attempt to open or disassemble Camera as this will affect any warranty claim.

## ● Uninstalling the camera driver

There are two tasks that need to be done to uninstall the SPYPEN IUNO driver. Firstly, remove the device from the Operating System through the Device Manager. To do this:

1. With the SPYPEN IUNO camera connected, open the System Control Panel and go to the Device Manager.
2. Remove "WWL 102 Camera" from the "Imaging devices" list.
3. Remove "WWL 102 Camera Composite Device" from "Universal Serial Bus controllers" list.
4. Remove "USB Audio Device" from "Audio Devices" list.
5. Close Device Manager.
6. Unplug the camera.
7. After the restart you will need to delete the inf file.
  - On Win98/Me systems delete "WWLSTV102.INF" and "WWLSTV102C.INF" files from the <windowsdirectory>\inf\ and <windows>\inf\other directory.
  - On Win2k/XP the files will be named oemn.inf and oemn.pnf, located in <windows>\inf directory. Value of varies from PC to PC. You may need to open the oemn.inf files in a text editor to see if they are related to the WWL 102 camera.
8. Delete the entire \WWL folder from <windows>\twain\_32.
9. Reboot the machine.

You have removed the driver files and associated registry entries. To reinstall your camera driver, please refer to User Manual.

## ● Regulatory Information

### FCC Notice

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.
- Consult the dealer or an experienced radio/TV technician for help.

Shielded cable must be used with this unit to ensure compliance with the Class B FCC limits.

Under the environment with electrostatic discharge, the product may malfunction and require user to reset the product.
